3 Drawer Chest

W:875mm D:450mm H:760mm
Internal Drawer Dimensions:
W:800mm D:320mm H:160mm

5 Drawer Slim Jim

W:500mm D:400mm H:1006mm
Internal Drawer Dimensions:
W:420mm D:300mm H:120mm

Care and Maintenance

The Furniture should be dusted with a very lightly damp cloth (to help collect dust particles) but a soft dry cloth can be used. Always wipe in line with the wood grain. A coat of natural beeswax should be applied to the wood a couple of times a year to maintain its lustre. A soft furniture brush designed for buffing wax polish is recommended. Due to the textured finish of the wood, there is a possibility of splintering whilst cleaning and polishing. Care must be taken during this process and if there is any doubt it is advised this action is carried out by a professional. Avoid the use of cleaning agents or spray polish as these can contain abrasive substances or solvents, and over a period of time these can penetrate the finish and spoil the surface.

Furniture tops may be damaged by hot plates, wet cups and objects with sharp or hard surfaces. It is recommended to use place mats. Spilt liquids should be wiped off immediately.

When lifting/carrying to move larger items, they should be carried by at least two people and held along the sides and/or the frame. No additional loads should be on the furniture and it must not be pulled along the floor this can weaken the joints and damage the furniture permanently.

The Furniture should be placed at least 1 meter from active heat sources such as radiators and heaters. They should be used in rooms that are dry, closed and protected against the effect of atmospheric conditions including the effect of direct sunlight. Too dry or damp air may cause deformities to some parts of the furniture. Avoid placing the furniture on damp surfaces.

If applicable, at least every 4 months the bolts should be checked to make sure that they are tight.

The stools and pads should be cleaned with a damp cloth. Never use cleaning agents that contain abrasive substances or solvents.

Stools needs to be placed on a level surface to ensure stability when sitting.

The stool is only intended for indoor use and can be used by one person only.
Do not stand on the stools.

At least every 4 months the bolts should be checked to make sure that they are tight.
