Trend TALK

Introducing rust tones into your space.

Rich clays and rusty reds pair beautifully with warm wood-style floors. Introduce a trend-led Clay palette into your home, with a feature colour to two of four walls within a room to create a warm, inviting feel.

For a more subtle approach, mix and match soft furnishings like seat cushions or rugs in varying shades of Clay to create depth. This works particularly well to soften angular kitchens and rooms with hard surfaces.

Neutrals with monochrome accents.

Hello, sophistication.

Pairing light, neutral washes of wall colour with patterned flooring allows your intricate floors to become the main feature within a space.

Despite what you might think, when used sparingly, smatterings of dark accent colours can help to add a cosy feel to light, neutral spaces. This scheme screams sophistication while being surprisingly liveable. Cosy up in style!

Trend TALK

Waving in a Seascape palette.

Salty blues and seafoam greens are a match made in beachy heaven with orange-based flooring colours.

To bring this tonal range into your home, get creative with decoration and choose areas such as door frames or sections of wall panelling as coloured accents. We suggest decorating directly onto staircases or along walls running parallel with stairs in hallways as this theme is bright and welcoming. With Seascape, this scheme is your oyster!

Summer Oak

Sunny Summer Oak works with natural lighting to make rooms feel more dynamic.

When laid pointing away from your room's natural light source, Chevron patterns create the illusion of more space.
