VISPRING

Luxury Beds - London 1901

World leaders in sleep

Sleeping well depends, for the most part, on the bed you choose to rest on. Our lifestyles have changed beyond recognition over the past century, but our need for sleep remains universal — we simply cannot function without it. With this in mind, it makes sense to consider your choice of mattress very carefully, because good quality sleep is a commodity that we should all be investing in.

VISPRING
VISPRING

Why VISPRING?

In terms of evolution, the human body hasn't changed much over the last 200,000 years. We remain a culturally diverse species with one crucial thing in common — the need to sleep. Every single one of us needs to retire at the end of the day to relax, unwind and ultimately, switch off.

A mattress is arguably the most important piece of furniture you'll ever buy. You'd be hard pushed to find someone who hasn't ever spent a tortured night trying to doze off on an uncomfortable mattress; whether it's too soft, hard, or just plain lumpy, you can guarantee you'll wake up feeling worse than you did when you went to bed. So, the wisdom of buying the best you can afford shouldn't go unheeded.

Sleep is an activity so personal, private and unique that the notion of a one-size-fits-all approach to mattresses is absurd. Research has shown that compromising with a product that isn't best suited to your height, weight or sleeping style will undoubtedly lead to health problems in later life; all of which substantiates the case for choosing a high-quality alternative engineered to support your spine.

By inventing the pocket spring, we changed how the world sleeps. It's a reputation we're proud of, so we've always been very careful to protect our status as industry leaders by maintaining our excellent production standards. After over a century in business, we're still one of the only U.K. bed manufacturers to produce our own springs, which are made from the best Vanadium steel. Every mattress is made to order from start to finish at our Plymouth workshop. There's a choice of 74 distinct spring types, and of course, we're able to tailor the spring tension to your own specific needs — whether that's soft, medium, firm or extra firm.

Vispring mattresses and divans are **MADE WITH POCKET SPRINGS**. When needed, each spring moves independently, which means that sleeping partners are less likely to disturb one another when turning. This means every part of the body is properly supported.

Uniquely, all the springs used in Vispring mattresses and divans are actually made in the Vispring workshop in **PLYMOUTH.** Most other mattress manufacturers simply buy their springs from a wholesaler.

Our Sleep Credentials

Each mattress is **MADE BY VISPRING IN THE U.K.** Production is never sub-contracted to any other U.K. or overseas manufacturer. Everything is done in-house at our workshop in Plymouth.

We offer an industry unique **30-YEAR PRODUCT GUARANTEE.**

All mattresses are made of **NATURAL MATERIALS;** no plastic, polyester, foam or other man-made products or chemicals are used in the manufacturing process.

The Vispring air vents ensure a fresh and **HEALTHY AIR-FLOW** between the mattress and body, guaranteeing a cool and undisturbed sleep.

We provide a truly bespoke service and are able to make mattresses and divans of **ANY SHAPE AND SIZE.** Vispring make mattresses for yachts, four-poster frames, and other manufacturers bed frames. Divans and headboards can be finished with our customers own choice of fabric.

Vispring products are **HANDCRAFTED;** mattress edges are hand-sewn to provide greater comfort and longevity.

Vispring **DIVAN BASES ARE MADE WITH POCKET SPRINGS**; most other manufacturers use inferior 'coil springs' or no springs at all.

With **120 YEARS OF EXPERIENCE** handcrafting mattresses, Vispring has become one of the most trusted and best known bed makers in the U.K. and around the world.

The Vispring Comfort Promise

We always hope that those who make the decision to invest in a Vispring mattress will sleep happily ever after — but if you, after the first month's sleep decide you've made the wrong choice of spring tension, we're here to help. This is where the Vispring Comfort Promise swings into action and you may qualify for a one-time-only exchange for a mattress of a different tension.

If you have purchased a mattress and followed the weight guide advice from our website, or a sales consultant, then you will have the correct tension for your body weight. If however, after 30 night's sleep (but no more than 90 nights) you feel that a different tension would provide better sleep comfort, you will qualify for our Comfort Promise.

In order for us to facilitate the switch to a new mattress, our conditions state that the Comfort Promise only applies to mattresses purchased from an authorised Vispring specialist with display beds. Also, you must have tried the selected model at the store where you made your purchase, and been given individual advice by one of the in-store specialists. Our helpful guidance on bodyweight and sleep styles is generally sufficient to ensure our mattresses will always exceed your expectations - but if that's not the case, please get in touch.

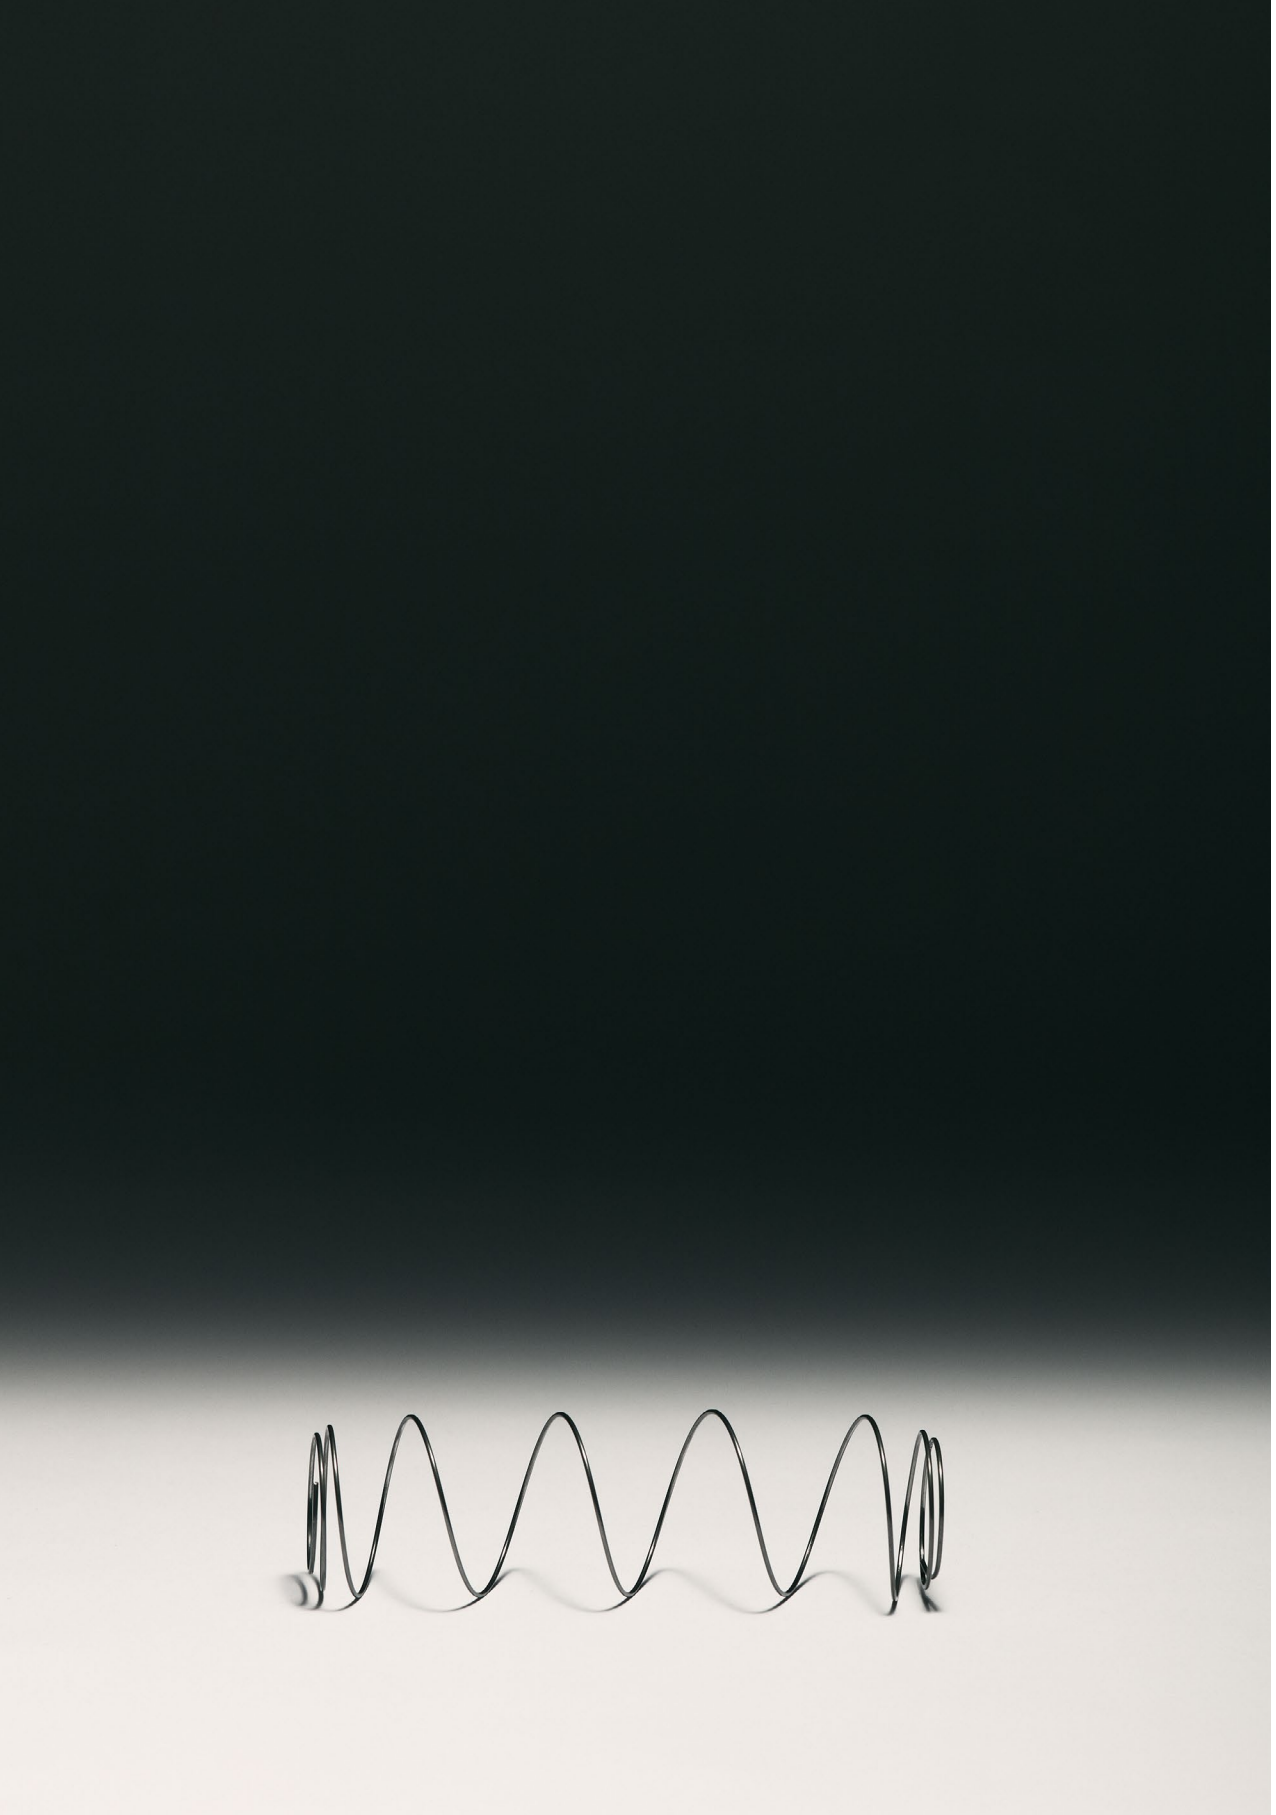

Please see the Vispring Comfort Promise terms and conditions on www.vispring.com.

30 Year Guarantee

We're so confident in our craft, that we offer customers a 30-year Vispring Manufacturers Guarantee. The high standard of design and raw materials, together with rigorous testing, means manufacturing faults are exceptionally rare. However, we promise that should an imperfection arise in a Vispring mattress or divan, which may be down to faulty workmanship or components, we will endeavour to repair or replace it free of charge.

Of course, normal wear and tear wouldn't constitute the activation of this Guarantee, but if anything other than this occurs within the life cycle of the product, we'll do our best to investigate the cause and find a solution.

Our Vanadium Steel Springs

Vanadium steel springs Vanadium steel springs Vanadium steel springs

The Legacy of Luxury

Built on the finest foundations

There's a reason our mattresses are a non-negotiable, essential fixture in world class hotels such as The Dorchester and 45 Park Lane. It's the same thinking that meant Vispring was specified for the first-class cabins of the Titanic and the Queen Mary. Whether on dry land or out at sea, the elegance and unmistakable comfort of our craftsmanship remains as popular today as it was in 1901.

Cutting corners has never been part of our philosophy – quite the opposite. Building a brand with luxury foundations means we've had to consistently maintain the highest standards, and we do this by using the finest raw materials available. Over the decades, we've seen the emergence and ultimate failure, of so many different transient trends in the mattress industry.

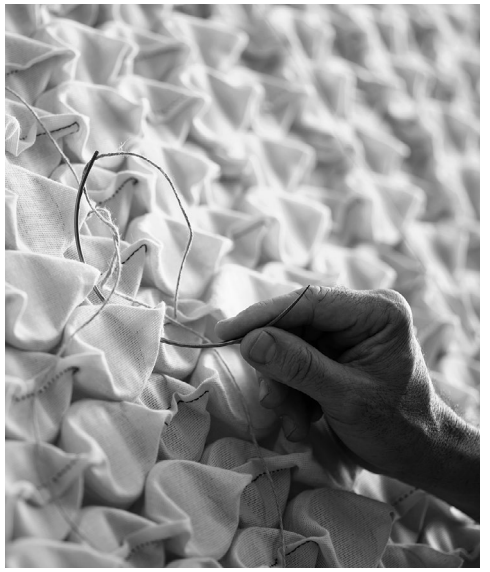

A Lifetime of Comfort

The principal methods we use have never changed, which means the life cycle of every Vispring mattress always begins with the springs. We have been bed-making innovators since 1901 and although our fundamental processes remain the same, we pride ourselves on striving to provide our customers with the best night's sleep by constantly evaluating, testing and improving what we do.

Spring Nesting
A Tailored Support System

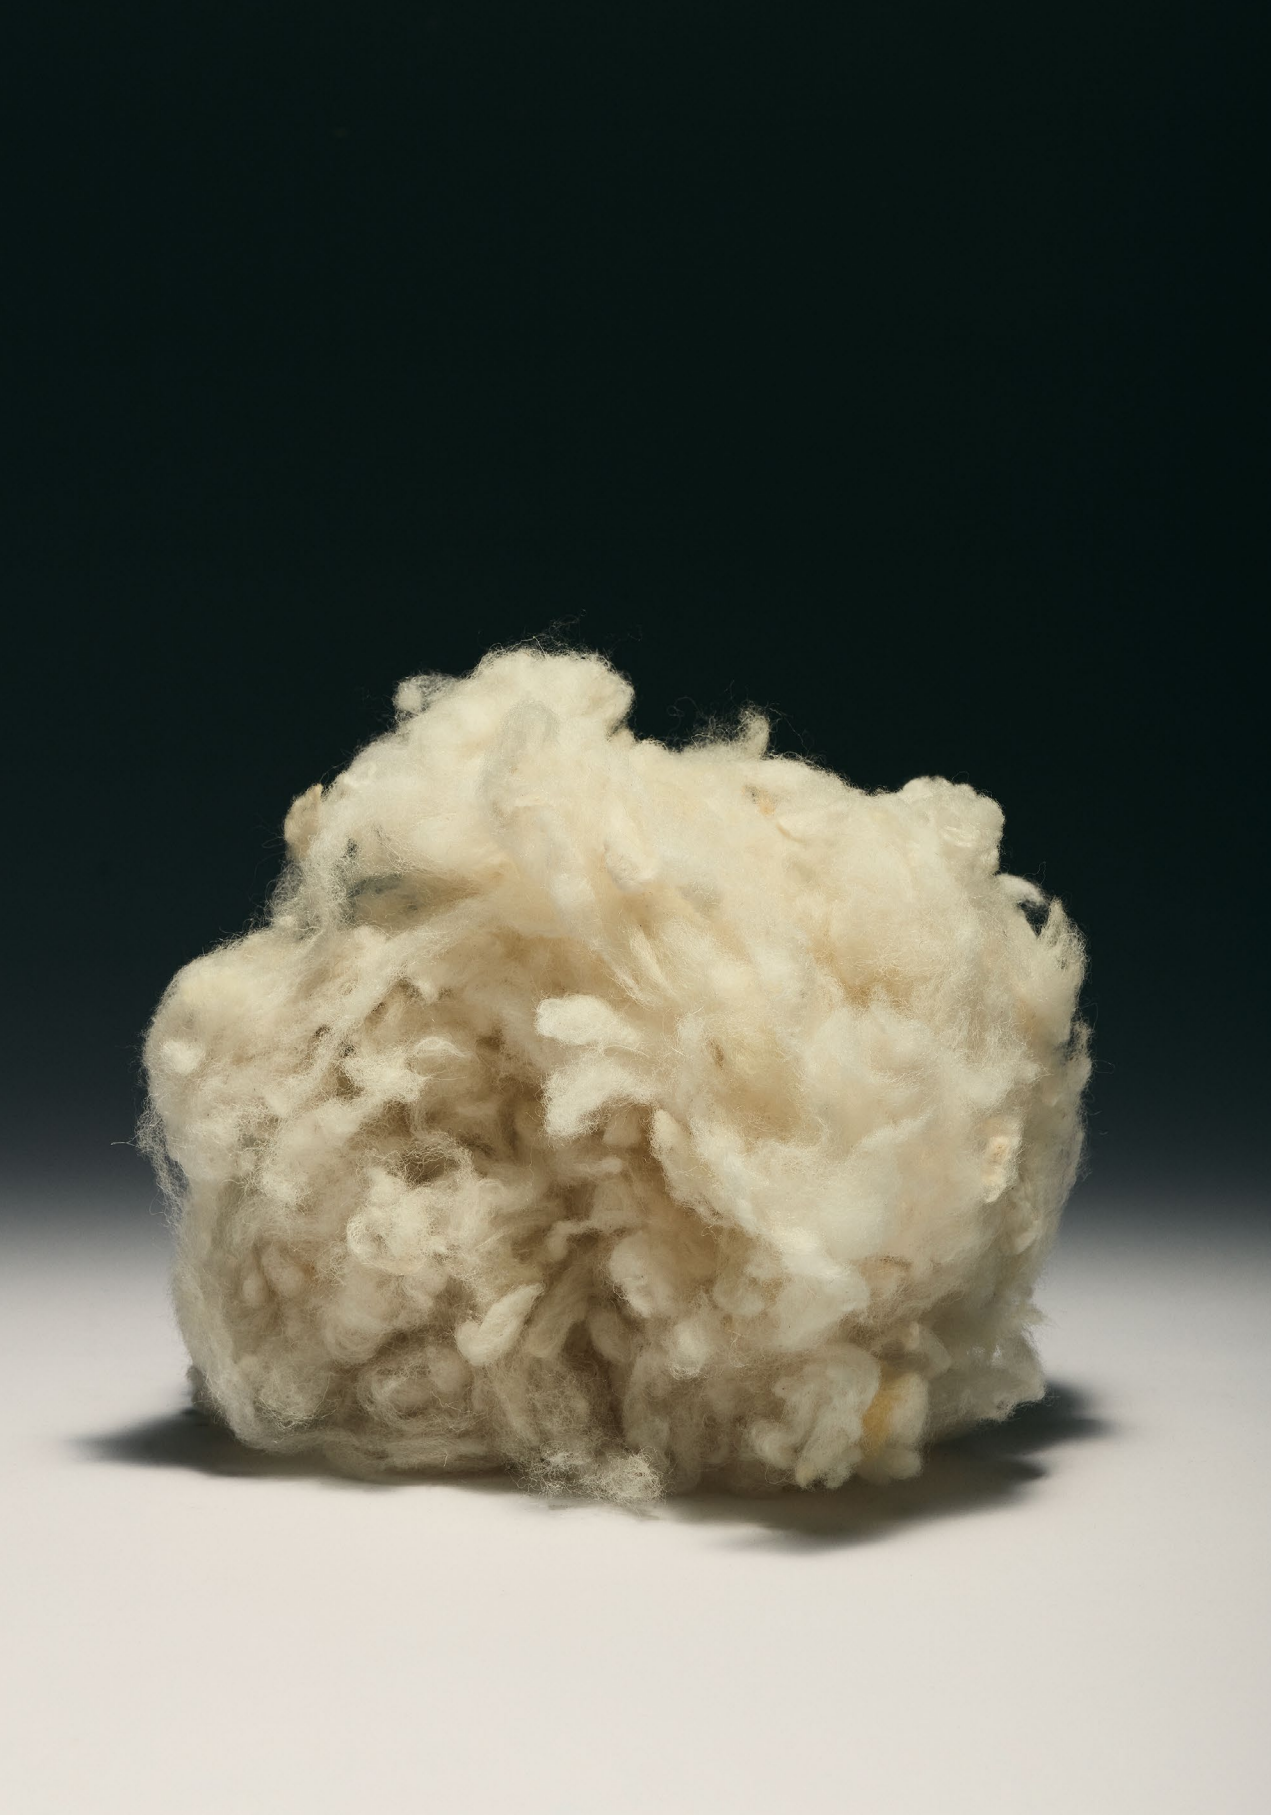

Inside every Vispring mattress, we install by hand, a single, double, or triple layer of honeycomb-nested calico pocketed springs. This isn't a new invention – this formation is well known as being the strongest and most resilient structure in the natural world, so it makes sense to use this grid in bed-building. To ensure each pocket spring works independently, our experienced technicians carefully enclose every single one into a cotton calico pocket. These are then skilfully hand-nested in a honeycomb pattern, which allows the individual springs to compress and expand in line with your body, supporting you from head to toe as you sleep.

Side Stitching
A Labour of Love

Unlike mass-produced mattresses, our iconic side-stitching is all done by hand. It's an intricate, labour-intensive technique that takes years to master. A major part of our core DNA, this process is integral to the quality and comfort of every Vispring and safeguards the 30 year guarantee that we've become famous for.

Up to six rows are deftly sewn with 100% natural twine, which provides the thousands of contact points between the outer shell and honeycomb spring unit. Understandably, the Vispring way takes time, but is driven by the need for durability and quality — it takes one craftsperson up to eight hours to side-stitch a mattress by hand. We think it's a method worth keeping.

Natural Fillings
Tenderly Teased

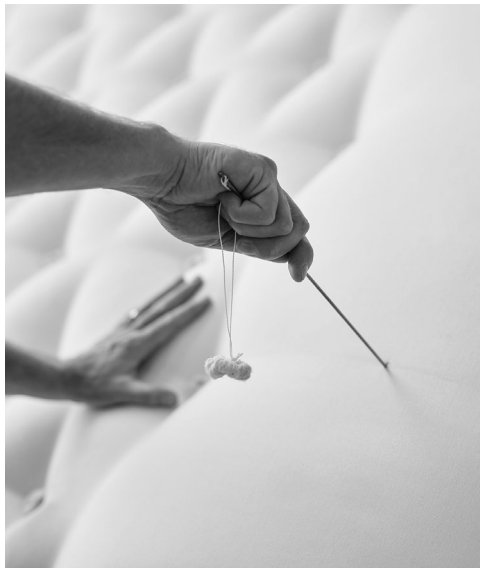

The living world almost always provides the best materials — which is why we only use the finest natural fibres to create our unsurpassably comfortable fillings. Whether it's wool, silk, bamboo, horsetail or cotton, every filament is lovingly hand-laid over the honeycombed pocket springs to provide a soft, breathable, hypo-allergenic and fully biodegradable foundation for sleeping.

Tape Edging
Structural Security

The skilled technicians at our Plymouth workshop use meticulous care to close every Vispring mattress. A strong but flexible ticking tape is used to join the side border to the top panel using a specially adapted sewing machine. This fastidious, thorough procedure seals the mattress to ensure a smooth surface with no raw fabric edges. Far from being decorative — it helps to safeguard the structure and give a beautiful, long-lasting finish.

Hand Tufted
Contoured for Comfort

At Vispring, we tuft each and every mattress by hand. Evenly distributed throughout the entire mattress, these tufts hold the fillings in position. It's these carefully judged tuft lengths that create our voluptuous signature contoured surface. Hand-tufting keeps everything secure and guarantees your comfort for thirty years – or more.

Sealed with Care
Belgian Damask

Once the mattresses have been filled, they need to be covered. We use the best quality ticking for all our mattresses. For the majority of our collection that means 100% Belgian Damask, which is made by Maes, a family-owned business in Flanders, who have been awarded the prestigious Oeko Tex® certification. This high-grade fabric is made of plant-based natural viscose and complies with the strictest REACH environmental laws and sustainable business practices.

From a safety perspective, whilst wool mattresses are naturally fire retardant, we treat ours with a substance called M-Pure. Crucially, this is a non-chemical treatment that only uses biologically based ingredients. The mattress edges are then closed with tape, which our skilled technicians apply by hand, using meticulous care to close the mattress panel and borders, leaving no raw fabric edges. Slender but incredibly strong, it leaves a beautiful, smooth finish.

SHETLAND WOOL

When you consider the calibre of raw materials we use, it's no surprise that a Vispring is much heavier than the majority of mattresses on sale today. Reassuringly, this is due to the volume of natural materials that we pack into each and every one; like real Shetland wool, which is incorporated to maximise comfort and help to regulate body temperature. It's an intrinsic part of our heritage — and with four full sheep fleeces used per mattress, it's important that we maintain close relationships with the crofting industry to safeguard their future, as well as ours.

In partnership with

Real Shetland Wool

THE CAMPAIGN FOR WOOL
Patron: HRH The Prince of Wales

PURE NEW WOOL

As the first U.K. bed-maker to be granted the prestigious Woolmark quality assurance certification, we've nurtured a long-standing fair-trade policy with the Shetland Wool industry and guaranteed that we'll purchase a substantial amount of each year's clip. Initiatives like ours keep this traditional trade alive and help the farmers to thrive. Every filament is responsibly sourced from within the British Isles and sheared from sheep with no harm done. The practice of removing their dense winter coats is all part of necessary animal husbandry and our commitment to buying local, as opposed to importing from overseas, ensures that an ancient way of life is preserved for all communities involved.

Soft and supportive with an in-built bounce that resists pressure, wool is recognised globally as one of the finest components for bed upholstery. Unlike foam or synthetic products, it's also naturally fire-resistant — negating the need for the use of toxic chemicals (the effects of which are still under investigation). We're proud of our affiliations with the British Wool Marketing Board and the Campaign for Wool, and with over a quarter of all U.K. Shetland Wool production ringfenced for Vispring it's clear to everyone involved that we're serious about sustainability.

Packed with Purity

Without our signature stuffing, a Vispring just wouldn't be the same. We source the highest quality natural fillings from all across the globe, and every fibre is specially selected to perform a very specific purpose. We've perfected the ideal blend which includes; 100% British wool, horsetail, silk, cashmere and mohair — all of which is expertly teased over the cotton covered pocket springs by hand. With components of this calibre, there is little wonder our loyal customers tell us they regret not investing sooner.

VICUÑA

Perhaps slightly less well-known than the other luxury fibres, Vicuña is sometimes referred to as a gift from the Andes and is, quite literally, worth its weight in gold. Combed with care from a rare and protected species related to the llama, Vicuña wool isn't widely available, which of course, impacts on the price. At Vispring, we incorporate this immensely soft, microlight fibre into our mattress fillings for warmth. Sourced from remote regions of the Andes, it is 100% biodegradable and free of lanolin, making it highly absorbent and naturally hypoallergenic.

COTTON

An all-rounder on the textile front, cotton has been farmed since prehistoric times. Originating in India around 6000BC, it's a shrub that's native to tropical and subtropical countries all around the world. At Vispring, we harvest ours from Turkey. The long-fibre cotton in all our products is super strong, but exceptionally soft, with an unparalleled sheen. A naturally hygienic product, its breathable qualities help to keep you cool, which also makes for a more comfortable sleeping environment.

CASHMERE

Cashmere is one of the most expensive, exclusive and desirable fibres in the world. This long, silky filament is eight times warmer than sheep's wool but significantly lighter. Our supplier is a member of the Sustainable Fibre Alliance (SFA), which promotes and oversees sustainability and animal welfare within the cashmere industry. It is collected during the spring moulting season to coincide with the natural shedding of dense winter coats. Sumptuously soft and luxurious, we add it to give our mattresses that very distinctive Vispring feeling.

SILK

Often referred to as the most indulgent fibres known to mankind, silk is also the strongest. We source ours from China, which is the original gateway to the ancient Silk Road. No longer the preserve of kings, queens and emperors, it is used as part of our unique filling because of its power to insulate whilst remaining cool to the touch. Silk will always be synonymous with an air of opulence, so this, along with its technical ability to cleverly adapt to ambient temperatures is the reason we'll continue to include it in our mattresses. Our blend includes Tussah and Mulberry silk, which are odourless and hypoallergenic — making it the perfect material for a luxurious mattress top layer.

BAMBOO

A highly sustainable crop native to China, Bamboo is one of the fastest growing plants on earth. Sometimes referred to as 'green steel' because of its strength and versatility, this eco-crop is entirely self-generating and doesn't require any chemical fertilisers or pesticides to flourish. When processed, its spun fibres are soft, absorbent and naturally anti-bacterial, making it an ideal component in our signature bed filling.

HORSETAIL

Horsetail is the longest known natural fibre and has been an integral part of furniture and bed-making for centuries. Bold, strong and bouncy, it's the magic ingredient that keeps Vispring mattresses in great shape — even after decades of constant use. Combed from either the mane or tail, we source the majority of ours from Austrian and South American horses, which are renowned as being the finest quality. It's untwisted by hand to preserve its inherently open structure and facilitate the air circulation. We often say that horsetail adds a million more springs and breathes the life into your mattress every morning as you rise.

WOOL

We only use fleece wool, which is produced the traditional way, causing absolutely no harm to the sheep. Wool production uses far less energy than manufacturing manmade fibres and is also recyclable, releasing nitrogen rich nutrients when used as a compost. Hard to ignite, wool doesn't melt or emit fumes and the presence of keratin in the fibre makes it a natural fire retardant.

The unpredictability of the climate in the U.K. impacts on the wool's intrinsic properties, which tend to be soft, springy but extremely strong. Naturally hypo-allergenic and fully breathable, it is ten times more absorbent than synthetic materials — which is critical and guarantees the mattress works in total harmony with your body, by regulating the temperature in your bed.

MOHAIR

Naturally non-toxic, hypoallergenic and flame resistant, mohair comes from the hair of the Angora goat. Combined with pure wool, it creates a durable fabric blend with extreme elasticity — perfect for preventing any sagging across the regularly used parts of your Vispring mattress. Comfortable and cooling, with natural insulating properties, we source ours from South Africa.

It takes confidence to shake up an entire industry, which is precisely what a young James Marshall did in 1899. A British Canadian engineer, he was the trailblazer responsible for pioneering the use of pocket springs in mattresses — a fundamental advancement that transformed the way we sleep. Previous incarnations, which were stuffed with a lumpy mixture of hay, down and cotton were soon considered antiquated in comparison to Marshall's radical invention.

A history stamped with the hallmarks of modernity

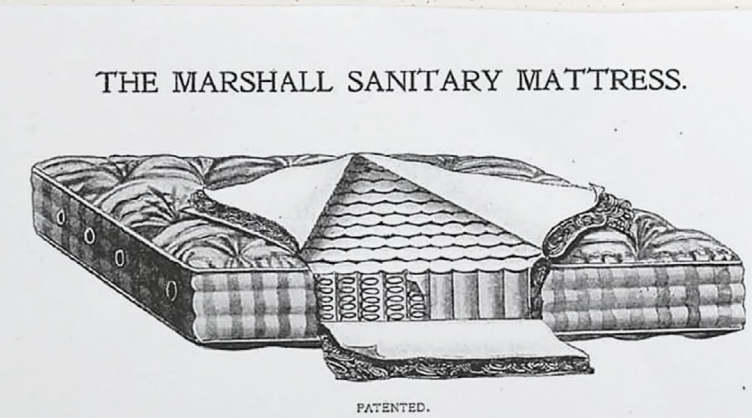

Packed with high quality natural fibres, his sumptuous coiled spring alternative put human physiology at the core by guaranteeing even weight distribution, shock absorption and long-lasting, unparalleled comfort. By 1901, ‘Marshall’ had started trading in the United Kingdom, and after ten successful years the company registered its new name ‘Vispring’ in 1911. Branded Vispring (VI) after the number of springs that were, at the time, used in each sewn pocket. This innovative approach gained serious momentum and by the 1920s these luxurious handmade mattresses were already commonplace in the bedrooms of the finest homes in the country.

1899

1901

John Nolon and Frederick James made an agreement with James Marshall to promote his revolutionary mattress in the United Kingdom. Unable to persuade local manufacturers to adopt the idea, they decided to produce the Marshall mattress themselves. The Marshall Sanitary Mattress Company was incorporated in London on 24 September 1901. The Vispring story had begun.

1899

James Marshall is a British/Canadian working in Canada. When his wife is taken ill, he creates a handmade mattress for her, with coiled springs wrapped in unbleached muslin, quilted with horsehair. Springs were already commonplace in chair seats and divans, but never before, had they been enclosed in pockets and integrated into a mattress.

1912

The bespoke comfort of Vispring’s mattresses begins to attract the attention of prestigious steamship companies. Having already equipped its flagship liner the ‘Olympic’ with Vispring mattresses in 1911, the White Star Line turns to Vispring once again to fit out its sister ship – the ‘Titanic’. Each of the vessel's 39 suites and 350 First Class cabins come complete with Vispring mattresses.

1911

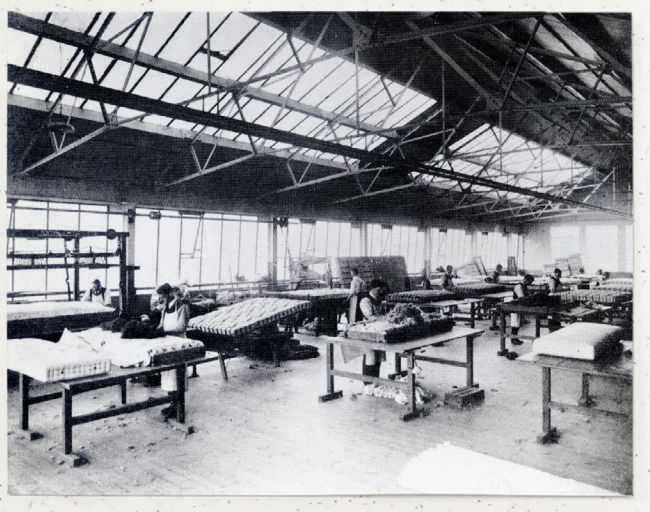

The company adopts the Vispring name and logo. For the past few years, the hare motif was used. This animal was chosen to illustrate the resilience and bounce of its springs – which, in the new branding, is combined with the Roman numeral VI: a subtle reference to the number of springs being sewn into each pocket.

1925

Vispring starts to use pure cotton as a filling component for each mattress. Prior to this, horsehair was the fibre of choice. With a long-standing belief in using only the finest natural materials, the range expands to include Shetland wool, silk and cashmere.

1932

Vispring introduces the world's first pocket-sprung divan, known as 'The Vibase'. This was celebrated as the perfect partner for its now iconic mattresses. Teaming the two together provided the ultimate sleep experience – which still holds true today.

1940 – 1946

To assist in the war effort, Vispring produces aeroplane parts in its north London workshop.

1961

Vispring launched 'The Hi-Vi Collection'. Aimed at a younger audience, the range featured bolder and more colourful beds.

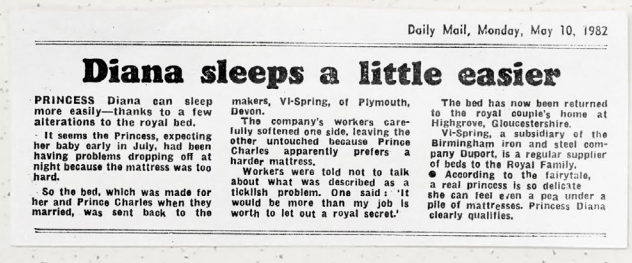

2001

The Vispring centenary was celebrated with a series of advertisements inspired by the company's early 1900s promotions.

1982

Princess Diana and Prince Charles opt for a split-tension mattress during the pregnancy of their son, Prince William. Vispring craftspeople helped the newly wedded mum-to-be rest easy, by making her side softer and keeping Prince Charles' side firm.

Daily Mail, Monday, May 10, 1982

Diana sleeps a little easier

PRINCESS Diana can sleep more easily—thanks to a few alterations to the royal bed.

It seems the Princess, expecting her baby early in July, had been having problems dropping off at night because the mattress was too hard.

So the bed, which was made for her and Prince Charles when they married, was sent back to the makers, Vi-Spring, of Plymouth, Devon.

The company's workers carefully softened one side, leaving the other untouched because Prince Charles apparently prefers a harder mattress.

Workers were told not to talk about what was described as a ticklish problem. One said: 'It would be more than my job is worth to let out a royal secret.'

The bed has now been returned to the royal couple's home at Highgrove, Gloucestershire.

Vi-Spring, a subsidiary of the Birmingham iron and steel company Duport, is a regular supplier of beds to the Royal Family.

● According to the fairytale, a real princess is so delicate she can feel even a pea under a pile of mattresses. Princess Diana clearly qualifies.

1971

Vispring moves production from London to Plymouth in south west England.

These days, each and every Vispring is made to order by skilled technicians at our workshop in Plymouth, on England's south west coast. Mattress-making is a detail-driven profession reserved for artisans with dexterity, who pride themselves on their respect for traditional craftsmanship. The way we sleep hasn't changed and neither have our methods – every single stage in our manufacturing process is the same today as it was in 1901. Creating our distinctive mattresses is a lengthy task that requires dedication, precision and professionalism from our workforce – there's no fast track route to perfection.

Today

2012

Vispring receives the highly prized Queen's Award for Enterprise. Instituted by Royal Warrant, the award honours businesses that have excelled in the fields of international trade, innovation or sustainable development. The presentation ceremony is a proud moment for all the company's staff.

Today

Over 200 skilled craftspeople work in the Vispring Plymouth workshop. Vispring beds are stocked by over 500 stores worldwide, which means the perfect night's sleep is available to more people than ever before.

The Ultimate Sleep System

We've been in this business for long enough to understand that there's no one-size-fits-all approach to sleeping. Sleep is personal, individual and entirely unique. It's for this reason that we offer such a wide range of different mattresses, with a choice of spring count, fillings and tension. This puts the power in your hands and allows you to pick the right one for you or opt instead for a customised, bespoke service.

To guarantee you choose the best mattress for your needs, we'd strongly suggest a visit to one of our retailers. In store, you can talk to an experienced member of our team to discuss which one of our many spring and filling combinations would work best for the way you sleep.

How to Sleep Happily Ever After

Buying a new bed isn't something you should do hastily, because there's such a lot to consider before you commit. At Vispring, our sleep specialists have garnered a host of helpful tips to help you choose the right one for you. In the same way as you'd visit a car showroom a number of times before signing on the dotted line — you should treat this journey with the same rigorous level of research. We've put together some advice as a helpful guide.

TRY BEFORE YOU BUY Finding your ideal level of support and cushioning takes time. It's always best to test each bed for at least 10 minutes by lying down in the position that you usually sleep in, and turning over a few times. If you share your bed with a partner, make sure you're both there when the testing takes place. Vispring make a range of beds, offering different spring tensions, fillings and sizes. Try a few in order to determine which one is the perfect option for you. You spend a third of your life in bed — take your time when deciding which one to buy.

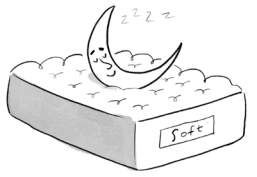

Tension Selection

Vispring make mattresses in four different tensions, Soft, Medium, Firm and Extra Firm. It's best to jettison all preconceived (or outdated) ideas about how a firm mattress is always best — because this is simply not the case. Tension is of course, all down to personal choice, but we would always ask you to consider your bodyweight as the main factor first. Spinal alignment needs to be correct to safeguard against aches and pains from sleeping on the incorrect mattress tension.

Combination Mattress

Our concept of comfort is subjective — but it's essential we experience the best level possible when trying to get a good night's sleep. To guarantee you wake feeling fully rested, Vispring will make your mattress with different spring tensions on each side — either soft and medium, medium and firm, or firm and extra firm. It's worth remembering that we also provide a bespoke service to tailor any mattress or divan to your specific needs.

Up to 11 stone (70 kg)

11 - 16 stone (70 - 102 kg)

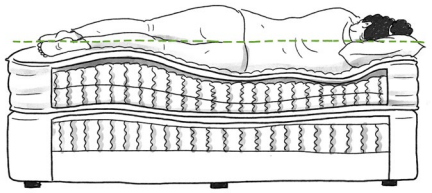

16 - 20 stone (102 - 127 kg)

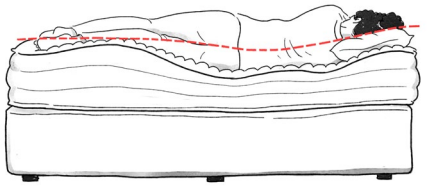

Above 20 stone (127 kg)

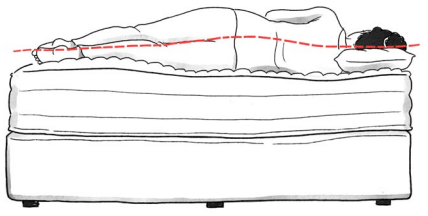

Choosing Your Perfect Bed

PERFECT SUPPORT The spine is straight and the entire body is evenly supported.

TOO SOFT The spine bows downwards, causing pressure around the hips.

TOO FIRM The spine bows upwards, causing pressure around the shoulders and knees.

A HANDY CHECK When you've taken everything else into consideration and you're 90% sure which mattress seems like the best choice, it's time to check the support. If the mattress is too firm, you'll be able to slide your hand easily between the mattress and the hollow of your back. If the mattress is too soft, sliding your hand beneath your back won't be possible. Relax, take your time and let your body decide what's right for you.

Unrivalled Comfort

The secret of comfort with a Vispring bed is down to the **DIVAN**, which increases the comfort level of the bed by up to 40%. Pairing a Vispring mattress with one of our divans increases the comfort level of the bed by up to 40%. A Vispring divan combines the strength of slow-grown Northern European timber, with body-responsive pocketed springs and a generous filling of premium natural fibres. Expertly blended, long lasting cushioning helps the divan adapt to your body movements and adds resilience for a lifetime of use. The quality of its construction means that, even on its own, a Vispring divan feels more comfortable than many mass-produced mattresses. There is no better foundation for a Vispring mattress.

Of course, pairing a Vispring mattress with your existing bed frame will still guarantee a lifetime of fantastic quality sleep. But if you're in the market for unparalleled comfort and support, we'd always suggest investing in a Vispring divan too, for the complete sleep system.

What's in a Vispring Bed?

As our name suggests, springs are the most important ingredient in the Vispring recipe. They work in harmony with the natural fillings and upholstery to supply a delicate balance of strength, durability and softness.

Ticking

All our mattresses are covered in high quality ticking, such as Belgian Damask and Pure Wool.

Side Stitching

Side stitching by hand gives supportive strength to the mattress edge.

Pocket Springs

The heart of the mattress and divan constructions are either one, two or three rows of honeycomb nested pocket springs.

FSC™ Certified Timber Frame

The solid timber frames are all made using northern European soft and hardwood from well-managed FSC™-certified forests and other controlled sources.

Tufts

We tuft each mattress by hand. Evenly distributed, tufts hold the fillings in place.

Tape Edging

We use meticulous care to close the mattress panel and border leaving no raw fabric edges. We finish the edge with white, grey or beige piping (depending on the collection).

Vents

The vents running along the side of our mattresses ensure fresh airflow and allow moisture to escape. It's the healthiest way to sleep.

Natural Fillings

All Vispring mattresses are filled with the finest quality natural materials like wool, cotton, horsehair, cashmere and silk.

Upholstery

The divans are hand-upholstered in fabrics from the Vispring Timeless Collection or the customer's own material.

THE ORIGINAL COLLECTION The starting point for Vispring comfort. Made with soft cotton, wool, highly durable pocket springs and the most comfortable natural finishes.

Elite

Baronet Superb

Devonshire

THE CLASSIC COLLECTION The next level of comfort. Each mattress is filled with the softness of materials like wool and fine horsehair. Underneath which, you'll find layers of individually pocketed springs.

Magnificence

BESPOKE MATTRESSES Every one of our beds is handmade to order, just for you. Although our mattresses are made using traditional methods, that doesn't mean they have to be conventional shapes. We can make mattresses with cut-out corners for antique bedsteads and four-poster beds, extra long and extra wide beds or divans in four sections to negotiate narrow or spiral staircases.

The Original Collection

The starting point for Vispring comfort. Made with soft cotton, hand-teased wool, highly durable pocket springs and the most comfortable natural finishes. In the Original Collection you will find our entry level range of beds, like the Devonshire. Our Devonshire mattress is made with hand-teased British fleece wool for an exceptionally resilient and comfortable sleeping surface.

ELITE MATTRESS Partners the De Luxe Divan

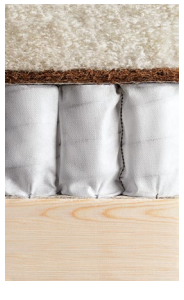

The Elite is a traditionally handcrafted mattress that provides a wonderful introduction to the world of Vispring. It's natural fillings wick away moisture to provide a hygienic, cool and inviting sleep surface. Perfect comfort for those who appreciate a soft yet supportive feel.

MATTRESS

- 1,254* hand-nested calico-pocketed Vanadium steel springs.
- Made exclusively from natural fillings: British fleece wool and cotton, blended British fleece wool and cotton.
- Finished with two rows of genuine hand side-stitching.
- Covered in finest quality Belgian ticking with hand-tufted felt washers.

DIVAN

- 600* hand-nested pocket springs.
- Solid timber frame - This product is made of FSC™ - certified and other controlled materials.
- Upholstered with natural coir, British fleece wool and cotton.
- Covered with finest quality ticking or upholstery fabric from our Timeless Collection.

The Luxe Collection

The ultimate in Vispring comfort. With multiple layers of handmade pocket springs for weightless comfort, each mattress is carefully filled with the finest natural materials. Cashmere, Tussah silk, fine horsehair, alpaca, and bamboo — we only use the highest quality materials for the Luxe Collection.

Carefully sourced from far-flung corners of the globe, and then finessed by our master bed makers — every fleece and fibre is feather-soft, downy and light. Since its introduction to the range, our Sublime Superb has always been a bestseller. With carefully chosen wool, silk and mohair fillings, it's a mattress guaranteed to offer an all-over sensation of calm.

VISPRING
VISPRING

TIARA SUPERB MATTRESS Partners the Sovereign Divan

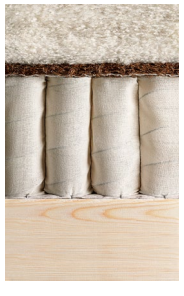

A distinctly traditional feeling Vispring mattress, the Tiara Superb's deep upholstery produces a voluptuous sensation. Pure natural materials of exceptional loft and softness result in a supremely adaptable mattress that is highly responsive to partners of different statures.

EUROPA Ottoman Base

Fusing functionality with a contemporary aesthetic, the Ottoman divan from Vispring features an end-opening that lifts up, with the help of gas struts, to reveal ample storage space. The Europa Ottoman divan is constructed using carefully nested pockets springs in a sustainable timber frame that create a responsive layer that works in harmony with the mattress above.

- Firm edge base.
- Floating, single layer mini-sprung pocket spring construction.
- 1260 mini-springs in size 150 × 200 cm (2 × 75 cm x 200 cm).
- High spec 30° offset gas strut with improved dampening.
- Inbuilt manual gas strut safety lock.

Note: The Europa Ottoman comes with mattress weight restrictions and only covers mattresses with a maximum weight of 79 kg. This means that it is only suitable for use with single spring mattresses in a soft, medium and firm tension.

SERENITY Adjustable Base

This powerful, Vispring-built recliner operates quietly and smoothly. Made with state-of-the-art remote technology and programmable positions – it's built with everything you need to rest easy.

- Cushioning decks filled with hand-nested and tied calico pocket springs for responsive support, superior comfort and breathability.
- High-quality TUV-homologated* motor drive.
- Wireless Bluetooth® pairing- no need for extra receiver or cables when linking bases.
- Saved memory position (1x user defined).
- Energy efficient- Eco-Design Directive** compliant.

*Third party testing and certification to ensure that the product complies with the necessary technical and legal requirements.
** The Ecodesign Directive of the European Union establishes a framework to set mandatory ecological requirements for energy-using and energy-related products sold in all 27 member states.
Note: The Serenity Adjustable Base comes with mattress weight restrictions and only covers Soft and Medium Tensions from the Elite Mattress to the Tiara Mattress.

CHARLOTTE Limited Edition

Experience the elegance of Vispring's Charlotte bed. Tailored to individual preferences, this exceptional bed frame is offered with a choice of a slatted or divan base. The ensemble boasts a soft, cushioned headboard for both style and optimal relaxation. Choose from three metal leg finishes to blend classic and modern aesthetics. The sophistication extends to the all-natural mattress crafted with care from locally sourced Exmoor Horn wool and Tencel™, ensuring the optimal blend of comfort and craftsmanship.

Elevate your sleep experience with the Vispring Charlotte bed set, where every detail is meticulously crafted for unparalleled comfort.

Our hand-upholstered **DIVANS** are the ideal base for any Vispring mattress. We carefully nest pocket springs in a solid timber frame, creating a responsive layer that works in harmony with the mattress above — it supports you perfectly to give the most comfortable sleep possible. Every divan is finished in the finest natural materials (like coir, cotton, horsehair and wool) and can be personalised with different fabrics and leg designs.

THE DIVAN COLLECTION

The De Luxe/Wool De Luxe Divan pairs with our Elite, Baronet Superb and Devonshire mattresses and it has 600* supportive pocket springs.

The Prestige/ Wool Prestige Divan pairs with the Herald Superb, Dartington, Regal Superb, Shetland and Kingsbridge mattresses. It has 950* pocket springs which increases the support to this range of mattresses.

The Sovereign/Wool Sovereign Divan pairs with the Tiara Superb, Sublime Superb and Shetland Superb mattresses and had 1344* calico pocketed springs. We increase the support further for these mattresses as we use more springs and fillings here, making them heavier.

The Viceroy Divan pairs with our Signatory and Magnificence mattresses. This divan has 2010* calico pocketed springs in a double layer to increase the support for our heavier Luxe Collection mattresses.

DIVAN HEIGHTS

Choose from three different divan heights, depending on the style of your bedroom and your preferences about ease of access to your bed.

17 cm Shallow Sprung Divan

25 cm Low Sprung Divan

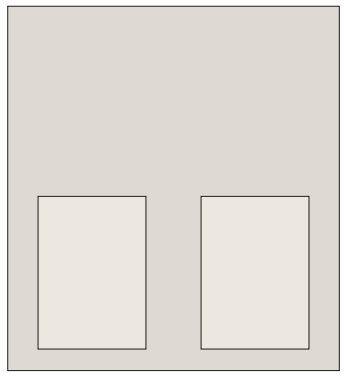

31 cm High Sprung Divan

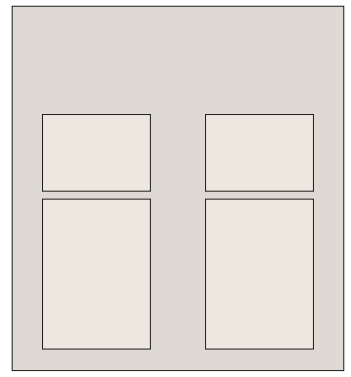

Divan height is from bottom edge to top edge. 'Doming' effect of upholstery fillings will add approximately 4 cm to the height if measured at the centre. Shepherd castors will add 7 cm. Locking castors will add 8.5 cm to the height from the floor to the botton edge of the divan.

DRAWERS are optional with a **DIVAN BASE**, providing convenient under-bed storage. These drawers blend into the divan's design, offering a discreet solution to keep your bedroom organised and clutter-free. With smooth gliding mechanisms and customizable configurations, they add both functionality and style to your living space.

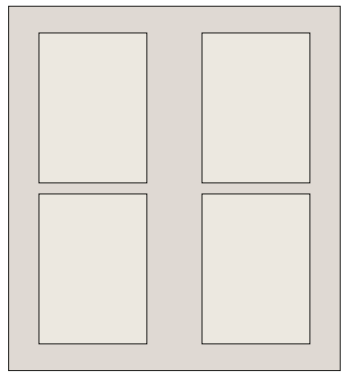

The Vispring high (31 cm) divan offers three different sizes along with versatile configuration choices.

2 Drawers

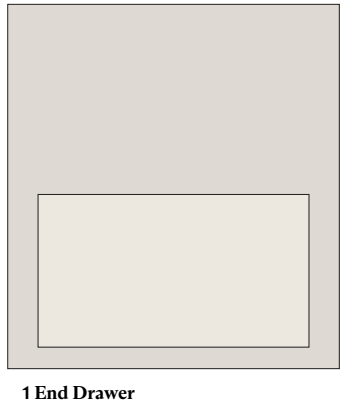

2 + 2 Drawers

4 Drawers

For beds measuring from 135 cm to 150 cm in width, an end-drawer option is available.

1 End Drawer

For the ultimate in Vispring luxury, complete your mattress and divan with one of our **HEADBOARDS**. With styles to suit traditional or contemporary homes, there's a model for every taste and interior.

All of our headboards are upholstered with sumptuous fabrics from the Vispring Timeless Collection, or in your own personal choice of material.

To ensure a perfect fit with your divan base, our headboards are available in a variety of sizes. Extra-large versions can also be supplied if you prefer your headboard to be wider than your divan base.

More styles from our three headboard collections: Elegant, Contemporary and Designs/Patterns can be found on www.vispring.com.

Everything But The Bed

Why do we spend on cars, kitchens and sofas, but not on sleep?

by Leanne Cloudsdale

My Vispring epiphany happened in the summer of 2007. Aged 33, I made the decision to spend a hard-earned work bonus on a mattress that cost four times my monthly salary. Since then, I've never looked back. I could've splashed out on a fancy holiday or a designer watch, but instead, I ploughed that money into a life changing piece of furniture.

A renter since university, I'd tolerated the lumpy beds provided by various landlords and figured that my hectic London lifestyle was probably to blame for the daily aches, pains and general malaise that I experienced rolling over to switch off the alarm each morning. All that changed after a week of house-sitting for a colleague who owned a Vispring.

This brief dalliance with a more sophisticated lifestyle had a lasting effect on me. Sure, the scented candles, top-notch kitchen equipment and impeccable interior décor were all memorable, but it was the bed that left a lasting impression. Compelled to peel back the sheets and find the label, I followed up with a quick internet search, to find out how much it would cost to become part of this exclusive community of mattress aficionados. Prior to this, I'd never really thought about whether my mattress was impacting on my wellbeing; I cycled to work, ate healthily and wore SPF in the sun. Buying a new bed was what happened when you stepped on the property ladder for the first time, got married, or moved countries — but it certainly wasn't something that you actually ever talked about.

How odd, when you consider how we communicate so freely about our other hefty life purchases. We'll happily wax lyrical with family or friends about the smart new car on the driveway, the aspirational coffee machine or the iconic accent chair for the lounge — but when it comes to bedroom stuff, we maintain a vow of silence. You won't hear Vispring customers shouting from the rooftops about their latest king size for the guest suite either; theirs is an invisible luxury, a discreet indulgence that speaks volumes about how much they value a good night's sleep. So why isn't everyone following suit?

The majority of bed-hunters are compelled to take the route of least resistance and opt for the cheap, readily available, but ultimately less comfortable high street option. Mindless modern consumption stops long-term thinking in its tracks. The reasons why we'd rather put our money where the neighbours can see it — as opposed to the most private room in the house are complex, but perhaps it's time to change the way we think.

It seems reasonable to assume that how often you use a piece of furniture should be reflected in the amount of money you spend on it. Daily usage demands investment. What's stopping you from replacing that cranky old squeaking excuse of a mattress? Why wake up miserable, when the perfect antidote exists? You might assume that the marketing blurb about how humans spend 30% of their lives in bed would hit the message home, but no, we switch off, because that kind of narrative just isn't sexy in a world where we prefer to turn the page and satisfy our insatiable desires with the quick-fix status symbols instead.

By taking an alternative approach, you're guaranteed to reap the rewards. There's an abundance of evidence quantifying the relationship between good sleep hygiene and a healthier mind and body. Retiring to a sumptuous bed each night should be something you look forward to and it doesn't take a genius to work out that the mattress you're sleeping on is probably the most crucial variable. The ones made by Vispring have followed the same formula since 1901, which tells you something valuable about the kind of company they are. It takes real guts and business acumen to maintain momentum by producing the same product for over a century and never buckling under the weight of transient trends. From the very beginning, their pocket spring design was pioneering and their dedication to manufacturing a human-centred product without ever cutting costs is remarkable.

If sustainability is a concern, you're in the right place. Not only is a Vispring better for the environment due to its natural fillings and recyclable springs, they are built to last a lifetime which means zero waste. No planned obsolescence. No smoke and mirrors. No secrets about the first-class components, the process or the people. Think of it as a non-negotiable living expense instead of a 'designer' purchase. Form and function are combined to create something with integrity engineered to support our hard-working bodies and make us feel better. You could say that good sleep isn't cheap, but for me, it was worth every penny.

Leanne Cloudsdale is a design journalist and communications consultant. She works with a range of prestigious international brands — including Vitsœ, RIMOWA, Farfetch, Studio Nicholson, Drake's and LVMH to help them convey the benefits of buying less, but better.
